EXPERIENCE

FULL STACK WEB APPS

- Built several web apps with different techniques (server side rendered like with django, or API powered apps like React paired with Flask and Neo4j ,and a hybrid using NextJS) .
- Implemented Authentication using various methods JWT , or third party packages (eg; NextAuth) .
- Explored how we can build an SPA with vanilla js and browser APIs only .

WEB UNDER THE HOOD

- Explored how web works under the hood by implementing a simple server in assembly (fasm).
- Duged deep into JS , and handled advanced concepts such as closure (using lexical scope) , Prototypal chaining...
- Took a sneak peak under what is happening in the v8 engine and the environment in which JS is used (browser APIs and nodeJS).
